SUMMARY

Full-Stack Developer with 2+ years of experience building and deploying scalable web applications. Proficient in **React.js, Node.js, MongoDB, Express.js, and REST APIs**, with hands-on experience leading a web development startup and delivering responsive, user-focused solutions. Skilled in end-to-end application development, problem-solving, and modern web technologies.

EXPERIENCE

ArclogiQ Softwares Pvt. Ltd.

Oct '25 — Present

Software Engineer

Noida, India

Worked on Linksly.io using Next.js, Node.js, Express, and MongoDB in an Agile Scrum setup. [Linksly](#)

- Built reusable UI components and optimized server-side rendering performance.
- Implemented JWT authentication and secured backend routes.
- Managed stories and bugs using Jira, contributing to sprint planning and project tracking.

Tiny Trolly

May '25 — Sep '25

Software Developer Intern

Noida, India

Worked on building and improving the company's Shopify-based e-commerce website. [Tiny Trolly](#)

- Developed and customized Shopify themes and Liquid templates.
- Integrated payment gateways, product catalog, and essential Shopify apps.
- Optimized website performance, responsiveness, and overall user experience.

Nextzen Software Solution

Jan '24 — Present

Co Founder & Full Stack Developer

New Delhi, India

Founded and built full-stack projects for clients using the MERN stack. [Nextzen Software](#)

- Delivered complete web applications from planning to deployment.
- Implemented authentication systems with JWT and bcrypt for user security across projects.
- Designed responsive and clean UIs with React.js + Tailwind CSS, enhancing user experience across devices.
- Used Node.js/Express to create RESTful APIs and connected them with MongoDB for scalable data storage.

PROJECTS

Code Master Web App [Link](#)

- Built a responsive full-stack coding platform with role-based access for users and admins.
- Implemented JWT authentication, protected routes, and secure login/registration.
- Developed admin & user dashboards for managing topics, questions, articles, and learning progress.
- Managed global auth state using React Context API & Reducer, with Axios and React Hook Form for smooth API interactions.

Book Store Web App [Link](#)

- Built a full-stack bookstore application using React, Node.js, Express, and MongoDB with features like book browsing, cart, and orders.
- Implemented JWT authentication and protected routes for secure access and controlled navigation.
- Developed RESTful APIs to manage books, users, cart, and order workflows.
- Created a responsive UI with React Router, smooth navigation, and theme toggling. [Project Details](#)

Food Ordering Web App [Link](#)

- Built a responsive food ordering SPA using React, enabling users to browse food items, manage cart, and place orders.
- Implemented client-side routing with React Router and centralized state using React Context API for cart and UI state.
- Designed intuitive UI components (menu display, cart, navbar, order flow) with Tailwind CSS for a clean user experience.
- Included user authentication flows (login/signup modal interface) and seamless checkout navigation. [Project Details](#)

SKILLS
